NEHAL SHAIKH

Pune, Maharashtra | +91 8698467217 | nehalshaikh02017@gmail.com | linkedin | github.com/Nehalshaikh8698

PROFESSIONAL SUMMARY

B.E. graduate in Artificial Intelligence and Data Science with skills in MERN stack development. Experienced in React.js, Node.js, Express.js, MongoDB, REST APIs, and JavaScript. Also have hands-on experience with Python, AI/ML, and Generative AI through projects and internship experience.

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, Java, C++, SQL
- **Frontend:** React.js, HTML5, CSS3, Tailwind CSS, DaisyUI, Axios
- **Backend:** Node.js, Express.js, REST APIs, JWT Authentication, Socket.io
- **Databases:** MongoDB, Mongoose, MySQL
- **AI / Machine Learning:** Machine Learning, Deep Learning, NLP, PyTorch, TensorFlow, Large Language Models (LLMs), Generative AI, Agentic AI
- **Tools & Platforms:** Git, GitHub, VS Code, Postman
- **Core Concepts:** Data Structures & Algorithms, OOP, DBMS, REST API Design
- **Soft Skills:** Communication, Team Collaboration, Analytical Thinking, Troubleshooting, Quick Learner

WORK EXPERIENCE

Software Developer Intern — Codec Technologies Pvt. Ltd. 01/2025 – 03/2025

- Developed full-stack features for an AI-based code review platform using the MERN stack.
- Designed and integrated RESTful APIs in Node.js and Express.js for code submission and result retrieval.
- Integrated Google Generative AI to automate code analysis and generate structured developer feedback.
- Built responsive, reusable React.js components with Axios for asynchronous API communication.
- Improved performance and maintainability by refactoring components and streamlining debugging workflows.

PROJECTS

Protein Sequence Estimation using NLP Python, PyTorch, Hugging Face, MERN

- Developed a Transformer-based NLP system for protein sequence prediction and mutation analysis.
- Built model inference pipelines in Python using PyTorch and Hugging Face Transformers
- Applying deep learning and sequence modeling to bioinformatics problems.
- Designed backend integration and data processing workflows in Node.js and MongoDB for real-time analysis.
- Implemented input validation and result visualization to improve usability.

Real-Time Chat Application React.js, Node.js, Express.js, MongoDB

- Built a real-time chat application on the MERN stack with Socket.io for instant messaging and live user status.
- Implemented JWT-based authentication and secure user session management.
- Built responsive user interfaces with Tailwind CSS and DaisyUI.
- Added real-time messaging and online user status functionality.
- Improved reliability through centralized state management and structured error handling.

EDUCATION

Bachelor of Engineering, Artificial Intelligence and Data Science 2022 – 2026
D Y Patil College of Engineering, Pune, Maharashtra

CERTIFICATIONS & TRAINING

- **Full Stack Development Training, ExcelR (06/2026 – Present):** 5-month industry program covering React, JavaScript, Node.js, Express.js, MongoDB, and SQL.
- **MERN Stack Developer Internship Program, Codec Technologies:** Completed 2-month structured full-stack development program.
- **Data Structures & Algorithms Training:** Completed DSA coursework using Python and C++.
- **LeetCode:** Solved 150+ Data Structures & Algorithms problems.
